1. Claims 1-34 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of the record fail to teach or suggest singly and/or in combination an image encoding device and method that provides for a transformation component for converting an image into transformation coefficients by subjecting the image to a frequency decomposition, the image having an area; a dividing component for dividing the transformation coefficients produced by the transformation component into a selected region and a non-selected region on the image, the non-selected region being an area of the image other than an area defined by the selected region, an encoding component for encoding the transformation coefficients by allocating a greater quantity of information to the selected region than to the non-selected region; and a region adjustment component for controlling a bit allocation rate of the non-selected region by adjusting the area of the selected region as prescribed for in the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2621

Singhal et al., Gardos, Astle, Corset et al., Aono et al., Lee et al. and Cosman et al. all disclose systems similar to applicant's claimed invention.
